

Canada's Resource Champions

Porcupine Gold Mines

Porcupine Gold Mines is a subsidiary of Goldcorp Canada Ltd., situated in Timmins, Ontario. Porcupine consists of two distinct mining operations; Hoyle Pond Underground and Dome Underground. The properties have produced more than 16 million ounces of gold since production began in 1910 and include North America's longest continually operating gold mine.

Highlights from Porcupine Gold Mines' nomination

Running a mining project is difficult, running one that seeks to rehabilitate a large historic mining area in the centre of a city is almost impossible, yet Goldcorp is doing just that with their Hollinger Project in the centre of Timmins. Commitments to noise, dust, and vibration are all available via a live feed monitoring the project. Community feedback, project perception, regular updates to Council and the public prove that this company is interested in mining in a sustainable, transparent and accountable way.

Porcupine Gold Mines was nominated as a Resource Champion by Keitha Robson, Chief Administrative Officer, Timmins Chamber of Commerce.
